Result 1 of the DISSE Project is finally ready

The collection of National Reports for the project DISSE provides a view of the different partner countries' situations, regarding Digital Storytelling practices around the topic of Sharing Economy. After a general introduction and contextualization, each partner presents some examples of national Best Practices in the field; moreover, after the conducted interviews to expert professionals, extracts and analysis of the information collected are presented. Finally, each National Report includes a list of relevant topics to be later developed in the further Project's results.

In the last few months, the DISSE partners met several times both online and in person in Rome, Italy, for the 2nd Transnational Meeting, and in Ubrique, Spain, for an LTTA - Learning Teaching Training Activities

During these meetings, the partners discussed the status of the project and the expected results.

Moreover, during the LTTA in Spain, the partners, both in presence and online, participated in several sessions on Digital Storytelling. Specifically, the topics discussed were:

- Introduction to Digital Storytelling (DST)
- General discussion on what Digital Storytelling is
- How we can use it as a tool for the Sharing Economy
- Stages/parts for the DST Storyboard, screenplay, audio recording, video editing
- How to create your own Sharing Economy storyboard and video

You can take a look at the videos made during the LTTA and in general during the project's lifetime on our YouTube channel.
